Re: Centron Fuel Supplements

Thank you for introducing our specialized trucking company to the Centron Fuel Supplement products. We have used many different fuel additives through the years with little success, my experiences have given me some skepticism with regard to fuel additives, most have not lived up to my expectations.

After using Centron fuel supplements for over a year we have noticed many benefits with this great all in one fuel supplement. Most importantly we have noticed over a 10% fuel savings, which gives our company a return on investment helping our company save money on fuel.

Our fleet has found Centron to help with Ultra Low Sulfur Diesel lubrication, it also has helped with Bio-Diesel related issues we were having. It is very important our fleet has as little down time as possible, that is why we believe so strongly in having a preventative maintenance answer to our fuel related issues such as; gelling in cold temperatures, bio-organisms in fuel, lubrication for ULSD, and water in fuel. I have also found that our 2007 or newer engines have been regenerating less often, which helps save fuel and prolong the life of our EGR's and DPF's.

Overall Centron has helped our fleet save money on fuel, reduce maintenance cost, and reduce harmful emissions. B&K Trucking specializes in hauling alternative energy loads such as; windmill blades and bases, and ethanol systems used for producing ethanol gasoline. As a progressive green company we are very happy to help reduce our diesel emissions with Centron Fuel Supplements.

Again, thank you for introducing us to Centron Fuel Supplements.

Regards,

Bob Martyn  
Fleet Maintenance Manager
